«Green leaf» Ltd. Ekaterinburg Russia Search for a local company foreign markets

Main activities Qualitative and quantitative improvement of sweets

- According to research company Abercade, LLC "Green Leaf" is among the biggest players on the production of table sweeteners and sweetener mixtures for industrial use.
- The company "Green Leaf" has been developing formulations and manufacturing tabletop sweetener compositions on natural and synthetic based on full-cycle high quality diet and diabetic food.

Experience in the implementation of business projects

- The company operates in the market of sweeteners and food additives since 1993.
- Over twenty years of life of the entity acquired the status of a stable and reliable company. Is a recognized leader in Russia and the CIS in the design and manufacture of sugar substitutes brands for dietary and diabetic supplies.
- Software development and engineering biotechnology projects includes the following main areas :
- industrial ecology,
- Urban ecology,
- ecology of food,
- agroecology,
- building projects for the production of grain processing and production of sugary foods as the foundation of the food industry raw materials and substances for the pharmaceutical industry in the territory.
- At present, the enterprise " green leaf " function workshop for production of sweeteners.

Market strategies

- Sweeteners such as sucralose, neotame and stevia, are not yet widely spread in the market and are imported at the minimum level.
- A segment of intense sweeteners in bulk by 16 times, and in value up to 6 times less than the segment sweeteners. The level of sweetness of these additives in the tens or hundreds times higher than sugar. Therefore, the doses of these substances are reduced by a corresponding amount to an acceptable level in making a particular product.
- The level of consumption of sweeteners in the food industry in this period ranged from 6.7 % in the total consumption of sugar, while the worldwide consumption of sweeteners is not less than 20%.
- An important segment of consumption for sugar substitutes in Russia can become
 a health food segment, which today is at an early stage of development. At the
 same time, according to research conducted in the days of the international
 exhibition of food WorldFoodMoscow- 2011, 65 % of Russian entrepreneurs and
 41 % of foreign consider the direction of healthy eating profitable.

«Green Leaf»Ltd. Proponent of healthy eating

- Given the current trends in the foreseeable future, we can expect dynamic growth
 of this segment. Sugar substitutes are more "healthy alternative" to sugar as they
 have a minimum energy value, some of them are not absorbed by the body, do
 not contribute to the level of sugar in the blood, reduce caloric intake, do not
 cause caries.
- In addition, experts have noted a tendency to an increase in the market share of more "healthy sweeteners" such as stevioside, sucralose. Despite their high cost, the manufacturers give them preference in connection with the trends of concern for the health of the consumer market.
- The World Health Organization estimates that there are over a billion people worldwide are overweight, 400 million of whom are obese. Launches of new products containing stevia, rose while those artificial sweeteners decreased because consumers do not want calories, but a natural, alternative sweetener.
