

Uvadrev-Holding

2016

**Uvadrev-Holding - one of the biggest producer of the composite particle board in Russia.
The history of existing plant has began at 1935
The company's mission is "reliability and quality proven throughout the years."**

Producing cycle include all stages: from wood cutting to end-product, also planting new forest at all harvesting territory.

Annual wood harvesting volume is 550 000 m³
with all cut out in long term rented land

Harvesting performed by automatic harvesting machines

Wood delivered from forest to plant by pool of own special trucks.

Wood sorting at the plant doing by modern automatic Springer sorting machine.

Chip board is producing by 2 independent lines at the same production site:

- 2 stages press by “Bison” with capacity 200 000 m³ chip board per year.

Size 2440x1830

- Continuous press by “Siempelkamp” with capacity 300 000 m³ chip board per year.

Sizes 2750x1830 and 2440x1830

Total capacity is 500 000 m³ of chip board per year

Thickness from 8 to 40 mm

Usual and water-resistant chip board

Producing highest quality more than 97%

E1 ecology class

Producing laminated chip board is doing by 3 modern “Dieffenbacher” short-cycle presses

Capacity of short-cycling presses allow to laminate all chip board from two main presses

Producing highest quality more than 98%

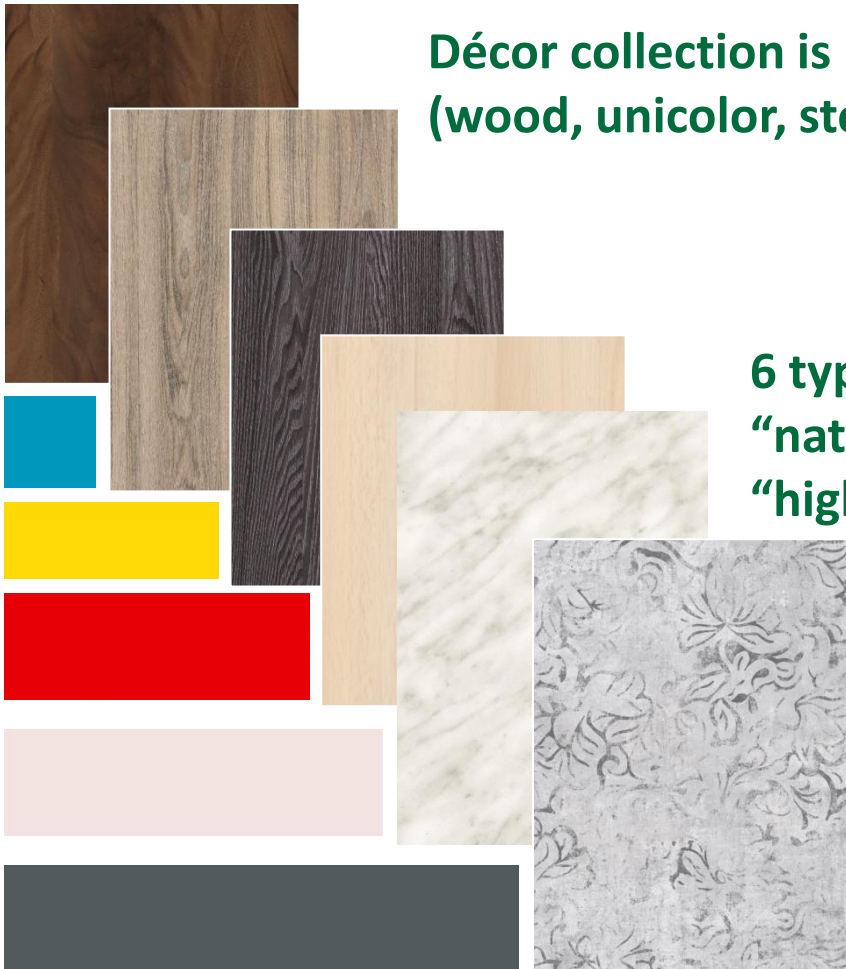

**Décor collection is more than 150 variants
(wood, unicolor, stone, metal)**

**6 types of surfaces: “wood structure”,
“natural veneer”, “matt gloss”, “rough”,
“high gloss wood”, “gloss”**

**Combining décor and press plates can make
900 different types chip board surfaces**

We are always testing all parameters of producing process:

- *Measure quality of chips*
- *Measure moisture of chips*
- *Managing glue mixing*
- *Control “sandwich” before press*
- *Control parameters of pressing*
- *Control thickness before and after sanding*

Our independent test-laboratory check quality of every portion of product.

Test physics and ecology parameters.

Production site has two railroad terminals.

We also have our own pool of trucks everyday making delivery to the customers all over Russia.
