

EFKO Group is the Russian fats and oils market leader
It is in the TOP-3 largest producers and exporters
of Russian sunflowerseed oil

CRUDE SUNFLOWERSEED OIL

Crude sunflowerseed oil is vegetable oil obtained from sunflower seeds and went through mechanical cleaning.

Crude sunflowerseed oil is widely used as material in the food industry: for the production of bottled sunflowerseed oil, bakery and confectionery products, as well as in soap making and medicine.

Quality specifications of crude sunflowerseed oil

- F.F.A. basis 2 pct, max 3 pct (with non-reciprocal allowance of 1:1), between 2 and 3 fractions in proportions;
- Moisture and impurities max 0,5 pct;
- Flash point min 121 c;
- Hydrocarbon content (c10-c56) – max 50 ppm as per Dr. Verwey laboratory.
